

## **The Pascoe Prediction**

A tale of cons, colour, and cunning.

In this routine, you'll tell the story of **Joseph Pascoe**, the Old West con man who only swindled those who deserved it. Pascoe challenged a ruthless loan shark to a simple guessing game with a red and blue chip. The shark won the first two rounds—then lost the next three, just as Pascoe predicted before a single chip was drawn.

Included with the Equalizer Chips is **The Pascoe Prediction**, a fully scripted routine where your spectator plays the loan shark. They might win the start, but you've already written how it ends.

**Outcome predicted. Pride undone. Pascoe always wins.**
